

## Addendum to Argonne National Laboratory's Information Technology Access Agreement for the Argonne Leadership Computing Facility

This addendum to Argonne National Laboratory's Information Technology Access Agreements includes additional terms specific to the Argonne Leadership Computing Facility.

You agree to Argonne's Cybersecurity policies which are outlined or incorporated by reference in the Argonne National Laboratory Information Technology Agreement (ANL-714).

- SSH access requires a passcode token
- No group accounts allowed
- No sharing of accounts or of passcode tokens
- You will keep your remote system secured and free of viruses, malware, spyware
- You will report suspicious activity or security breaches (including your remote system) to [support@alcf.anl.gov](mailto:support@alcf.anl.gov)
- You agree to abide by all policies stated at <https://docs.alcf.anl.gov/policies/>

Project PI/Proxy: The Project PI/Proxy is responsible for the oversight and management of all users associated with the project and for ensuring that such users comply with applicable policies, agreements, and project requirements.

Consistent with this responsibility, Project PIs/Proxies must approve and maintain project user accounts, including renewals and foreign national approvals, in accordance with ALCF account sponsorship and retention policies. See "Your Responsibilities as an Account Approver" [here](#).

Nothing in this addendum supersedes or replaces the individual obligations of users under ANL-714 or other applicable Argonne or ALCF user agreements

These policies may be amended or updated from time to time, and without prior notice.
